

# Advanced Lithium Power Inc.

## News Release

April 4, 2006

Vancouver, B.C. – Advanced Lithium Power Inc. (ALP) is pleased to announce that Quantum Fuel Systems Technologies Worldwide, Inc.(NASDAQ: QTWW) has acquired a stake in the company.

Quantum and its subsidiary, Tecstar Automotive Group, are leaders in powertrain engineering, system integration, and manufacturing of packaged fuel systems and accessories for specialty vehicles and applications including fuel cells, hybrids, alternative fuels, hydrogen refueling, new body styles, mid0cycle vehicle product enhancements and high performance engines and drive trains for OEMs and consumers of aftermarket parts and accessories. Quantum also designs and manufactures hybrid and fuel cell vehicles. Quantum has product commercialization alliances with General Motors, AM General, and Sumitomo. Quantum’s customer base includes General Motors, Toyota, Opel, Hyundai, Suzuki, Ford, DaimlerChrysler, Aero Vironment, and the U.S. Army.

“This is a major development, especially for a new company like Advanced Lithium Power,” said ALP President and CEO Lorne Gettel. “To bring the advantages of our lithium ion power system to the automotive industry, we needed the involvement of a respected Tier One supplier like Quantum, and with this investment, we have the support and market access to really fast-track that process. With Quantum’s help, our technology can make great strides as part of their hybrid electric and fuel cell vehicle programs.”

Both ALP and Quantum have expressed confidence that they can also field applications for this technology in other markets like solar energy systems, backup power, stationary power systems and consumer power supplies.

Advanced Lithium Power Inc. is a private company registered in British Columbia, Canada. ALP is a developer of advanced electric power systems, primarily based on advanced lithium ion batteries coupled with proprietary energy management systems.
